control and information technology

## control & automation systems backed by experience

The **Inspec group of companies** was formed by engineers determined to create a company of highly skilled, experienced and practical, technologists. We competently service the control & information system requirements of the petrochemical, iron & steel, power generation and other high speed manufacturing industries. Our projects range from process and manufacturing control systems, DCS implementation, safety system and plant monitoring systems to web enabled database systems.

Our technical team are all professional engineers with years of experience in completing complex IT, control and automation projects on time and to budget – onshore and offshore.

All projects are meticulously planned and executed in a structured and professional manner with system integrity and quality being the focus of all we do.

### Control & Automation

All Our engineers have unparalleled experience of control and automation projects for blue chip clients to local manufacturing companies. We undertake:

- > **Project Design Consultancy**
- > **System Expansions**
- > **Feasibility Studies**
- > **Cost Assessments**
- > **Conception, design, implementation and commissioning of PLC, SCADA & DCS control and automation schemes**
- > **Motor control centre design and supply instrumentation specification and supply**
- > **Cabling Design**
- > **Plant level systems information gathering, for on-site (LAN) or off-site (internet) visualisation and reporting for manufacturing plants**
- > **Management Information Systems**

### Information Technology

Inspec Solutions offers a wide range of services in the field of Information Technology. We have developed systems on and are familiar with a wide range of platforms and versions:

- > **Database Systems**
- > **Bespoke Software Applications**
- > **Database Driven Dynamic Websites**
- > **E-commerce Systems**
- > **Intranet and Extranet Applications**
- > **Network and Computer System Implementation**
- > **Training Courses**
